Shak. SHALL, v. i. [Sax. scealar, scylar, to be obliged. It coincides in signification nearly with ought, it is a duty, it is necessary; D. zal, zul; G. soll; Sw. skola, pret. skulle; Dan skal, skulle, skulde. The German and Dutch have lost the palatal letter of the verb; but it appears in the derivative G. schuld, guilt, fault, culpability, debt; D. schuld, id.; Sw. skuld, Dan. skyld. debt, fault, guilt; skylder, to owe; Sax. scyld, debt, offense, L. scelus. The literal sense is to hold or be held, hence to owe, and hence the sense of guilt, a being held, bound or liable to justice and punishment, In the Teutonic dialects, schulden, skyld, are used in the Lord's prayer, as "forgive us our debts," but neither debt nor trespass expresses the exact idea, which includes sin or crime, and liability to punishment, The word seems to be allied in origin to skill, L. calleo, to be able, to know. See Skill. Shall is defective, having no infinitive, imperative or participle. It ought to be written shal, as the original has one l only, and it has one only in shalt and

Shall is primarily in the present tense, and in our mother tongue was followed by a verb in the infinitive, like other verbs. "Ic sceal fram the been gefulled." have need to be baptized of thee. Matt. iii. "Ic nu sceal singan sar-cwidas." I must now sing mournful songs. Boethius.

We still use shall and should before another verb in the infinitive, without the sign to; but the signification of shall is considerably deflected from its primitive sense. It is now treated as a mere auxiliary to other verbs, serving to form some of the tenses. In the present tense, shall, before a verb in the infinitive, forms the future tense; but its force and effect are different with the different persons or personal pronouns. Thus in the first person, shall SHALLOON', n. [said to be from Chalons, simply foretells or declares what will take in France; Sp. chaleon; Fr. ras de Chasimply foretells or declares what will take simply foretens or accurate state. called a county. The shire was originally a division of the kingdom under the jurisdiction of an earl or count, whose authority was entrusted to the sherif, [shirereeve. On this officer the government ultimately devolved. In the United States, the corresponding division of a state is called a county, but we retain shire in the compound half-shire; as when the county court is held in two towns in the same county alternately, we call one of the divisions a half-shire.

In some states, shire is used as the constituent part of the name of a county, as Berkshire, Hampshire, in Massachusetts. These being the names established by law, we say, the county of Berkshire, and we cannot with propriety say, the county of Berks, for there is no county in Massachusetts thus named.

A metal of a white color and lively brilliancy. It has neither taste nor smell; its specific gravity is 10.552, according to Bergman, but according to Kirwan it is less. A cubic foot weighs about 660 lbs. Its ductility is little inferior to that of gold. It is harder and more elastic than tin or gold, but less so than copper, platina or iron. It is found native in thin plates or leaves, or in fine threads, or it is found mineralized by various substances. Great quantities of this metal are furnished by the mines of South America, and it is found in small quantities in Norway, Germany, Spain, the United States, &c. Kirwan. Encyc.

Among divines, sin is original or actual. 1. After; from the time that. The proper Actual sin, above defined, is the act of a moral agent in violating a known rule of duty. Original sin, as generally understood, is native depravity of heart; that want of conformity of heart to the divine will, that corruption of nature or deterioration of the moral character of man, which is supposed to be the effect of Adam's apostasy; and which manifests itself in moral agents by positive acts of disobedience to the divine will, or by the voluntary neglect to comply with the express commands of God, which require that we 2. should love God with all the heart and soul and strength and mind, and our neighbor as ourselves. Then let example be obey'd. Granville. Since, when it precedes a noun, is called a preposition, but when it precedes a sentence it is called an adverb. The truth is, the character of the word is the same in both cases. It is probably an obsolete participle, and according to the usual classification of words, may be properly ranked with the prepositions. In strictness, the last clause of the passage above cited is the case absolute. "The Lord hath blessed thee, since my coming," that is, my arrival being past. So, since the world began, is strictly past the world began, the beginning of the world being past. In the first case, since, considered as a preposition, has coming, a noun, for its object, and in the latter case, the clause of a sentence. So we say, against your arrival, or against you come.

Sw. skilia, Dan. skiller, to divide, sever, part; whence shield, that which separates, and hence that which protects or defends; D. scheelen, to differ; schillen, to peel or pare. Scale is from the root of these words, as in shell, Sax. scyl, sceal. In Heb. 500 is foolish, perverse, and as a verb, to pervert, to be foolish or perverse; in Ch. to understand or consider, to look, to regard, to cause to know, whence knowledge, knowing, wise, wisdom, understanding; Rab. to be ignorant

or foolish; Syr. to be foolish, to wander in mind, also to cause to understand, to know, to perceive, to discern, also to err, to do wrong, to sin, to fail in duty; whence foolish, folly, ignorance, error, sin, and understanding : Sam. to be wont or accustomed, to look or behold. The same verb with w. Heb. שכל signifies to understand, to be wise, whence wisdom, understanding, also to waste, to scatter or destroy, to bereave, also to prosper; Ch. to understand; שכלל to complete, to perfect ; כלל with a prefix. This signi-

fies also to found, to lay a foundation; Syr. to found, also to finish, complete, adorn, from the same root; Ar. \= :

shakala, to bind or tie, whence Eng. shackles; also to be dark, obscure, intricate, difficult, to form, to make like, to be of a beautiful form, to know, to be ignorant, to agree, suit or become. These verbs appear to be formed on the root 53, to hold or restrain, which coincides in signification with the Ch. Eth. כהל to be able, L. calleo, that is, to strain, stretch, reach, and with כלל to perfect, that is, to make sound, or to reach the utmost limit. The sense of folly, error, sin, perverseness, is from wandering, deviation, Gr. exolog: the sense of skill and understanding is from separation, discernment, or from taking, holding or reaching to, for strength and knowledge are allied, and often from tension. The sense of ignorance and error is from wandering or deviation, or perhaps it proceeds from a negative sense given to the primary verb by the prefix, like ex in Latin, and s in Italian. The Arabic sense of binding and shackles is from straining. The Eng. shall and should belong to this family.]

[Note .- This word is not used in chimistry or mineralogy for the dissolution or melting of

bodies by the heat of fire. 1 The term solution is applied to a very extensive class of phenomena. When a solid disappears in a liquid, if the compound exhibits perfect transparency, we have an example of solution. The word is applied both to the act of combination and to the result of the process. Thus common salt disappears in water, that is, its solution takes place, and the liquid obtained is called a solution of salt in water. Solution is the result of attraction or affinity between the fluid and the solid. This affinity continues to operate to a certain point, where it is overbalanced by the cohesion of the solid; it then ceases, the fluid is said to be saturated, the point where the operation ceases is called saturation, and the fluid is

1. A well known substance manufactured chiefly from the sugar cane, arundo saccharifera; but in the United States, great quantities of this article are made from the sugar maple; and in France, a few years since, it was extensively manufactured from the beet. The saccharine liquor is concentrated by boiling, which expels the water; lime is added to neutralize the acid that is usually present; the gresser impurities rise to the surface, and are separated in the form of scum; and finally as the liquor cools, the sugar separates from the melasses in grains. The sirup or melasses is drained off, leaving the sugar in the state known in commerce by the name of raw or muscovado sugar. This is farther purified by means of clay, or more extensively by bullocks' blood, which forming a coagulum, envelops the impurities. Thus clarified, it takes the names of lump, loaf, refined, &c. according to the different degrees of purification. Sugar is a proximate element of the vegetable kingdom, and is found in most ripe fruits, and many farinaceous roots. By fermentation, sugar is converted into alcohol, and hence forms the basis of those substances which are used for making intoxicating ygen, carbon and hydrogen. Of all vege Rush as the most wholesome and nutritious.

T is the twentieth letter of the English Alphabet, and a close consonant. It represents a close joining of the end of the tongue to the root of the upper teeth, as may be perceived by the syllables at, et, ot, When t is followed by h, as in think and that, ut, in attempting to pronounce which, the voice is completely intercepted. It is therefore numbered among the mutes, or close articulations, and it differs from d chiefly in its closeness; for in prenouncing ad, ed, we perceive the voice is not so suddenly and entirely intercepted, as in pronouncing at and et. T by itself has one sound only, as in take, turn, bat, bolt, smite, bitter. So we are accustomed to

speak; but in reality, t can be hardly said, to have any sound at all. Its use, like that of all mute articulations, is to modify the manner of uttering the vocal sound which precedes or follows it.

the combination really forms a distinct sound for which we have no single character. This combination has two sounds in English; aspirated, as in think, and vocal, as in that.

The letters ti, before a vowel, and unaccent- T. as an abbreviation, stands for theologia; ed, usually pass into the sound of sh, as in nation, motion, partial, substantiate; which are pronounced nashon, moshon, parshal. substanshate. In this case, t loses entirely

its proper sound or use, and being blended with the subsequent letter, a new sound results from the combination, which is in fact a simple sound. In a few words, the combination ti has the sound of the English ch, as in Christian, mixtion, question.
T is convertible with d. Thus the Germans write tag, where we write day, and gut, for good. It is also convertible with s and z, for the Germans write wasser, for water, and zahm, for tame.

as, S. T. D. sancta theologia doctor, doctor of divinity. In ancient monuments and writings, T. is an abbreviature, which stands for Titus, Titius or Tullius.

As a numeral, T, among the Latins, 6. God's gracious presence, or the tokens of stood for 160, and with a dash over the

top, T, for 160,000. In music, T. is the initial of tenor, vocal and instrumental; of tacet, for silence, as adagio tacet, when a person is to rest during the whole movement. In concertos and symphonies, it is the initial of tutti, the whole band, after a solo. It sometimes stands for tr. or trillo, a shake.

The thanes in England were formerly persons of some dignity; of these there were two orders, the king's thanes, who attended the Saxon and Danish kings in their courts, and held lands immediately of them; and the ordinary thanes, who were lords of manors, and who had a particular jurisdiction within their limits. After the conquest, this title was disused, and baron took its place.

THINE, pronominal adj. [Goth. theins, theina; Sax. thin; G. dein; Fr. tien probably contracted from thigen. See Thou.

Cyc. Shak. Thy; belonging to thee; relating to thee; being the property of thee. It was formerly used for thy, before a vowel.

Then thou mightest eat grapes thy fill, at thine own pleasure. Deut xxxii.

But in common usage, thy is now used

before a vowel in all cases.

The principal use of thine now is when a verb is interposed between this word and the noun to which it refers. I will not take any thing that is thine. Thine is the kingdom, and the power, and the glory. Mar. Dict. In the following passage, thine is used as a substitute for thy righteousness.

I will make mention of thy righteousness, even of thine only. Ps. Ixxi.

In some cases, it is preceded by the sign of the possessive case, like nouns, and is then also to be considered as a substitute. If any of thine be driven out to the utmost

parts of heaven- Deut. xxx.

It is to be observed that thine, like thou, is and common language, your and yours are always used in the singular number as

well as the plural. HING, n. [Sax. thing, a thing, a cause; for his thingon, for his cause or sake; 3. An animal; as every living thing; every also, thing and gething, a meeting, council or convention; thingan, thingian, to hold a meeting, to plead, to supplicate; thingere, an intercessor; thingung, intercession; G. ding, a thing, a court; dingen, to go to law, to hire or haggle; Dingstag, Tuesday, [thing's day;] beding, condition, clause; bedingen, to agree, to bargain 5. In contempt, or contract, to cheapen; D. ding, thing, business; dingen, to plead, to attempt, to 6. cheapen; dingbank, the bar; dingdagen, session-days; dinger, dingster, a pleader; dingtaal, plea; Dingsdag, Tuesday; beding, condition, agreement; bedingen, to 7. Used in a sense of honor. condition; Sw. ting, thing, cause, also a court, assizes; tinga, to hire, bargain or agree; Dan. ting, a thing, affair, business, case, a court of justice; tinger, to strike up a bargain, to haggle; tingbog, records of a court, [thing-book;] tingdag, the court day, the assizes; tinghold, jurisdiction; tingmand, jurors, jury, [thing-men;] tingsag, a cause or suit at law, [thing-sake.] The primary sense of thing is that which comes, falls or happens, like event, from L. evenio. The primary sense of the root, which is tig or thig, is to press, urge, drive or strain, and hence its application to courts, or suits at law; a seeking of right. We observe that Dingsdag, Dingdag, in some of the dialects signifies Tuesday, and this from the circumstance that that day of the week was, as it still is in some states, the day of opening courts;

that is, litigation day, or suitors' day, a day of striving for justice; or perhaps combat-day, the day of trial by battle. This leads to the unfolding of another fact. Among our ancestors, Tig or Tiig, was the name of the deity of combat and war, the Teutonic Mars; that is, strife, combat deified. This word was contracted into tiw or tu, and hence Tiwes-dag or Tuesdag, Tuesday, the day consecrated to Tig, the god of war. But it seems this is merely the day of commencing court and trial; litigation day. This Tiig, the god of war, is strife, and this leads us to the root of thing, which is to drive, urge, strive. So res, in Latin, is connected with reus, accused. For words of like signification, see Sake and Cause. 1. An event or action; that which happens

or falls out, or that which is done, told or proposed. This is the general signification of the word in the Scriptures; as after these things, that is, events.

1. The act or business of exchanging commodities by barter; or the business of buying and selling for money; commerce; traffick; barter. Trade comprehends every species of exchange or dealing, either in the produce of land, in manufactures, in bills or money. It is however chiefly used to denote the barter or purchase and sale of goods, wares and merchandise, either by wholesale or retail. Trade is either foreign, or domestic or inland. Foreign trade consists in the exportation and importation of goods, or the exchange of the commodities of different countries. Domestic or home trade is the exchange or buying and selling of goods within a country. Trade is also by the wholesale, that is, by the package or in large quantities, or it is by retail, or in small parcels. The carrying trade is that of transporting commodities from one country to another by water.

2. The business which a person has learned and which he carries on for procuring subsistence or for profit; occupation; particularly, mechanical employment; distinguished from the liberal arts and learned professions, and from agriculture. Treason is the highest crime of a civil nature of which a man can be guilty. Its signification is different in different countries. In general, it is the offense of attempting to overthrow the government of the state to which the offender owes allegiance, or of betraying the state into the hands of a foreign power. In monarchies the killing of the king, or an attempt to take his life, is treason. In England, to imagine or compass the death of the king, or of the prince, or of the queen consort, or of the heir apparent of the crown, is high treason; as are many other offenses created by statute.

el in the English Alphabet. Its true primary sound in Anglo Saxon, was the sound which it still retains in most of the languages of Europe; that of oo in cool, tool, answering to the French ou, in tour. This sound was changed, probably under the Norman kings, by the attempt made to introduce the Norman French language into common use. However this fact may be, the first, or long and proper sound of u, in English, is now not perfectly simple. and it cannot be strictly called a vowel. UBIQUITARY, n. [supra.] One that exshortened and blended. This sound however is not precisely that of eu or yu, excent in a few words, as in unite, union, uniform; the sound does not begin with the distinct sound of e, nor end in the distinct sound of oo, unless when prolonged. It cannot be well expressed in letters. This sound is heard in the unaffected pronunciation of annuity, numerate, brute, mute, dispute, duke, true, truth, rule, prudence, opportunity, infusion.

Some modern writers make a distinction between the sound of u, when it follows r, as in rude, truth, and its sound when it UD/DERED, a. Furnished with udders follows other letters, as in mute, duke; making the former sound equivalent to 00; UG'LILY, adv. In an ugly manner; with rood, trooth; and the latter a diphthong equivalent to cu or yu. This is a mischievous innovation, and not authorized by any general usage either in England or the United States. The difference, very nice 2 indeed, between the sound of u in mute, and in rude, is owing entirely to the articulation which precedes that letter. For example, when a labial precedes u, we en ter on its sound with the lips closed, and UG'LY, a. [W. hag, a cut or gash; hagyr, in opening them to the position required for uttering u, there is almost necessarily Deformed; offensive to the sight; contrary a slight sound of e formed before we arrive at the proper sound of u. When r precedes u, the mouth is open before the sound of u is commenced. But in both cases, u is to be considered as having the same sound.

In some words, as in bull, full, pull, the sound of u is that of the Italian u, the French ou, but shortened. This is a vowel.

U has another short sound, as in tun, run, sun, turn, rub. This also is a vowel.

Gwener, from gwen, white, fair, the feminine of gwyn, white, fair, that affords happiness; also gwyn, rage, violent impulse of the mind, lust, smart; gwynau, to whiten; gwynt, wind, L. ventus; gwynawg, full of rage; gwent, an open country; gwenu, to smile; gwenwyn, poison, L. renenum, Eng. venom ; gwenwynaw, to poison, to fret or irritate. These affinities lead to the true origin of these words. The primary sense of the root is to shoot or rush, as light or wind. From light is derived the sense of white, fair, Venus, or it is from opening, parting; and from rushing, moving, comes wind, and the sense of raging, fury, whence L. venenum, poison, that which frets or causes to rage. These words all coincide with L. renio, which signifies to rush, to fall, to happen; venor, to hunt, &c. Shak. dom; G. weisheit, [wisehood;] D. wysheid;

Sw. visdom and vishet; Dan. visdom or viisdom. See Wise. Wisdom, it seems, is from the Gothic dialect.]

The right use or exercise of knowledge; the choice of laudable ends, and of the best means to accomplish them. This is wisdom in act, effect, or practice. If wisdom is to be considered as a faculty of the mind, it is the faculty of discerning or judging what is most just, proper and useful, and if it is to be considered as an acquirement, it is the knowledge and use of what is best, most just, most proper, most conducive to prosperity or happiness. Wisdom in the first sense, or practical wisdom, is nearly synonymous with discretion. It differs somewhat from prudence, in this respect; prudence is the exercise of sound judgment in avoiding evils; wisdom is the exercise of sound judgment either in avoiding evils or attempting good. Prudence then is a species, of which wisdom is the genus. Wisdom gained by experience, is of inesti-

mable value. It is hoped that our rulers will act with dignity and wisdom; that they will yield every thing to reason, and refuse every thing to force
